Office Action Summary

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 3, 4, 17, 19, and 20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 3 and 4 are indefinite as it is unclear what further structure is recited. Claims 17 does not further limit claim 1 as the radiation in the range 600-1100 nm already recited in claim 1 fulfills the recitation in claim 17, further recitation of this range a second time does not remedy this indefiniteness. Claims 19 and 20 are still substantial duplicate of claim 4. It is noted that even if claims 19 and 20 were crafted to read over claim 4 via amendment of a claim from which they commonly depend, they would still be substantial duplicates of each other, as applicant has provided no disclosure drawn to separate parameters for providing the functions.

Claims 1, 3, 4, 17, 19, 20, 32, 33, 35-37, 39, 52-58 and 68-70 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Diamantopoulos et al.

See column 6, line 1 to column 10, line 62, especially column 8, lines 54-59.

Claims 1, 3, 4, 17, 19, 20, 32, 33, 36, 37, 39-56, 58, 59 and 61-65, 67, 68, 70 and 72-74 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Hughes.

See column 3 lines 5 - column 4, line 45, and figures 1. The device displays an image of the light source.

Claims 1, 17, 57, 60, and 66 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hughes in combination with Diamantopoulos et al. Hughes teaches a device as claimed but does not specifically discuss pulse modulating the radiation. Diamantopoulos et al teach the

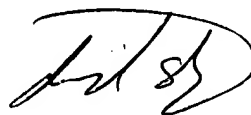

Art Unit: 3739

equivalence of continuous wave and pulse modulated light for providing a therapeutic effect with light. It would have been obvious to the artisan of ordinary skill to modulate the light produced by the device of Hughes, since this is equivalent to continuous light for providing therapy, as taught by Diamantopoulos et al, thus producing a device such as claimed.

Diamantopoulos et al teach the application of wavelengths above 1100 nm. See for example Table 1 thereof.

Applicant's arguments with respect to claims 40-51, 57, 59-67, and 72-74 have been considered but are moot in view of the new ground(s) of rejection.
